

Website Cookie Statement

A "cookie" is a small text file that is stored on your computer's hard drive and which records how you move around a website so that, when you revisit that website, it can present tailored options based on the information stored about your last visit. Cookies can also be used to analyse traffic and for advertising and marketing purposes.

Cookies are used by nearly all websites and do not harm your system.

Cookies are used on this site to track your use of our website via Google Analytics.

The data gathered enables us to understand how you use the site and track any patterns regarding how you are using our website. This helps us to develop and improve our website as well as products and/or services in response to what you might need or want. The data gathered in this way is anonymised so that you are not identified individually.

Most web browsers allow control of cookies through the browser settings. To find out more about cookies, including how to see what cookies have been set and how to manage and delete them, visit www.aboutcookies.org
